GOTHMOG THE TERRIBLE
GOATHEAD

Frenzy: A monster or gang with Frenzy gains **GOATHEAD** against any model that is suffering a wound.

Gothmog once led the Rangers as the tribe's brutal warlord. Under his ferocious rule, the Rangers became infamous throughout the Frostbite Reach. His rule was eventually undermined when Galt the Pig overthrew him and became the new warlord of the tribe.

Disgraced by his defeat, Gothmog now serves as The Goat's lieutenant. He nurses his hatred for his new warlord, waiting for an opportune moment to topple him, and return to his former glory.

Rimefrost are not so much a tribe as a loose alliance of tribes that have been driven to the north by the Dark Council and have turned to the embrace of the Goddess's Light.

Rebiled and outcast from their tribes, Rimefrost once retain their tribal instincts and will often band together around a strong leader or personality. To lead a Rimefrost tribe is a heavy burden. The tribe is constantly hunted by the minions of the Dark Council, and while Rimefrost are the most vicious and brutal of warriors, they are also the most unyielding. Without steady leadership they are easily lured by their base instincts and tempted to return to the Dark Council's fold once more.
