

Super Dungeon Epic: Rules Addendum

For those familiar with Super Dungeon Explore, most of the basic mechanics are the same: activate a model, move / attack as per your abilities / equipment.

The key difference is the number of models on the field. The models / boards are scaled so that each square on a standard Super Dungeon Explore board hold 4 standard / small models or 1 large model.

While Epic was originally designed for the "Forgotten King" ruleset, feel free to use 2.0 instead.

Depending on the intended difficulty, more heroes, spawn points and bosses may be used for a bigger adventure.
